**Industrial-Commercial-Institutional Boiler
Application for Approval or Permit**

This expedited permit and approval process is only available for facilities when:

- The boiler is greater than or equal to 10 MMBtu/hr and less than or equal to 100 MMBtu/hr.
- The addition of the boiler does not change the facility's requirement to obtain an operating permit in accordance with K.A.R. 28-19-500 et seq.
- The boiler is not subject to and does not cause the facility to become subject to 40 CFR Part 63 requirements.
- The fuel burned in the boiler contains less than 0.5 weight percent sulfur.

A fee is required if the boiler emissions exceed 40 tons per year (tpy) NO_x, 40 tpy SO_x, or 100 tpy CO. You may use manufacturer's emission data, or as a default, assume a fee is required if the boiler meets any of the following criteria: above 93 MMBtu/hr burning natural gas only; above 17.8 MMBtu/hr burning #1 or #2 fuel oil; or above 16.1 MMBtu/hr burning #5 or #6 fuel oil. The fee is 0.05% of the estimated capital cost of the boiler(s), minimum of \$100, maximum \$4000.
